DETAILED ACTION

Claim Rejections - 35 USC § 102

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) The invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claims 1-3, 6, 8-13 are rejected under 35 U.S.C. 102(b) as being anticipated by Arensmeler

The gas control system as claimed is fully anticipated by Arensmeler. In particular, Arensmeler discloses in col. 4, line 62-col. 5, line 25 that the igniter can be heated from a temperature less than the gas ignition temperature to a gas ignition temperature in approximately 2 seconds.

3. Claims 4-5 and 7 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

4. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.

Art Unit: 3749

Each of Moore, Katchka and Brown is cited to a system for warming a hot surface electrical resistance igniter.
